Section D. Glossary of Terms

Section E. References & Resources

Introduction to the Tool Kit

The purpose of this tool kit is to share resources and tools for managing the care of the resident with diabetes in the long-term care setting. It is intended for use by long-term care nurses and nursing assistants, dietitians, pharmacists and any others involved in the care for residents with diabetes. The tool kit is designed to complement *Diabetes Management in Long-term Care Facilities: A Practical Guide, 5th edition*.

The tool kit includes evidence- and practice-based tools compiled by the authors of *Diabetes Management in Long-term Care Facilities: A Practical Guide*. The tools include:

- Staff training materials
- Educational handouts for residents
- An extensive listing of medications and insulins
- Glossary of terms
- A list of references and resources for further information

As an electronic document, this tool kit will be updated at least annually. Check the website <http://ltcdiabetesguide.org> for new and updated materials.
